

TAPANGO LEADING SERIES

Full Stack vs. Forward Deployed Engineer

THE ROLE AI IS CREATING.

BUILD
THE PRODUCT

VS.

DELIVER
THE OUTCOME

Rob Howard

02

Full Stack Engineer

MISSION:

BUILD GREAT SOFTWARE.

THE QUESTION THEY ASK:

*“How do we
build the product?”*

FRONTEND

BACKEND

APIs

DATABASES

PERFORMANCE

SECURITY

03

Forward Deployed Engineer

MISSION:

SOLVE CUSTOMER PROBLEMS
WITH TECHNOLOGY.

THE QUESTION THEY ASK:

*“How do we solve
the customer’s problem?”*

ENGINEERING

AI & AUTOMATION

PRODUCT THINKING

CUSTOMER DISCOVERY

INTEGRATIONS

STRATEGY

Rob Howard

04

The Shift

Building Software

Delivering Outcomes

A Full Stack Engineer ships features.

A Forward Deployed Engineer helps customers achieve measurable business results.

The technology matters.

The outcome matters more.

VS.

FULL STACK ENGINEER

BUILD

SHIP

FEATURES

FORWARD DEPLOYED ENGINEER

UNDERSTAND

SOLVE

OUTCOMES

05
Skills
Comparison

FULL STACK
ENGINEER

VS.
FORWARD DEPLOYED
ENGINEER

Same foundation.
Different focus.

Full Stack Engineers
build the product.
Forward Deployed
Engineers deliver
business impact.

 FRONTEND	React	React
 APIs	APIs	APIs
 DATABASES	Databases	AI Workflows
 ARCHITECTURE	Architecture	Solution Architecture
 TESTING	Testing	Customer Discovery
 DEVOPS	DevOps	Executive Communication
 FOCUS	Product Features	Business Transformation

06 Impact in Action

DIFFERENT LENS.
COMMON GOAL.

Full Stack Engineers build
what users need.

Forward Deployed Engineers
ensure it creates measurable
business value.

FULL STACK ENGINEER

Builds the product

Ships features

Works with the team

Optimizes technical
performance

Focuses on what
we can build

VS.

FORWARD DEPLOYED ENGINEER

Understands the customer

Solves real problems

Partners with stakeholders

Measures business impact

Focuses on the outcomes
that matter

THE BOTTOM LINE

One builds the engine. The other drives the destination. **Together, they win.**

Rob Howard

07

When to Use Each

RIGHT SPRINT. RIGHT PERSON.
MAXIMUM IMPACT.

Both roles are essential.
Knowing when to lean on each
is how great teams move faster
and go further.

FULL STACK ENGINEER

Building a new product
or feature

Rapid prototyping
and iteration

Solving technical
challenges

Improving performance
and scalability

Ensuring code quality
and reliability

FORWARD DEPLOYED ENGINEER

Discovering and defining
customer needs

Solving real customer
problems

Aligning stakeholders
and building trust

Driving adoption and
measurable outcomes

Shaping strategy
and roadmap

PRO TIP

Start with discovery. Build with focus. Deliver with impact. **Pair both for exponential results.**

08

Stronger Together

DIFFERENT STRENGTHS.
UNSTOPPABLE TOGETHER.

The best outcomes happen when engineers who build and engineers who solve work hand in hand.

**ONE TEAM.
ONE MISSION.**

Build it. Solve it. Deliver it.
That's how we win.

**FULL STACK
ENGINEER**

Builds the foundation

Ships reliable features

Optimizes performance

Ensures quality and scalability

Drives technical excellence

**FORWARD DEPLOYED
ENGINEER**

Understands the customer and market

Solves real customer problems

Aligns stakeholders and builds trust

Drives adoption and measurable impact

Shapes strategy and roadmap

THE RESULT

Better products. Happier customers. Greater impact.
Together.
